

## Medical certificate for employment at the LMU Klinikum

Dear Sir or Madam,

a necessary prerequisite for employment at the LMU Klinikum is proof of immunity to various infectious diseases. The LMU Klinikum is also responsible for patient protection. As a maximum care hospital, we treat a high proportion of patients at risk of nosocomial infections (immunocompromised, multimorbid). Therefore, according to the measles protection law, immunity regarding measles, according to § 23a infection protection law, immunity regarding whooping cough and chicken pox and according to the law for strengthening vaccination prevention against COVID-19, immunity regarding coronavirus is required for all assigned persons. This also applies to persons with primarily non-patient duties (e.g., administration), as they may have (in)direct patient contact by entering wards.

The complete completion of the attached certificate by a licensed physician is a necessary prerequisite for your assignment at the hospital; this is the only way to ensure the protection of patients and employees from infectious diseases.

In principle, the publicly recommended vaccinations should be updated regularly. In this regard, consultation with a company physician or family physician is advisable.

Please visit your doctor at least 6 weeks before the planned start of your work with the attached certificate form, so that any necessary vaccinations can be carried out in good time.

We would like to point out that incomplete information or a lack of immune protection can lead to the fact that the activity at the LMU Klinikum cannot be started.

The physician must have completed the form in full and signed it. Afterwards, please send it to the site of the company medical service in whose area you will be working at least 2 weeks before the planned start of your work:

Campus Großhadern  
Campus Betriebsärztlicher Dienst  
Elisabeth-Winterhalter Weg 17  
81377 München  
Telefon 089/4400-72331 oder -72332  
Email: [Baedkum.Hospitanten-GH@med.uni-muenchen.de](mailto:Baedkum.Hospitanten-GH@med.uni-muenchen.de)

Campus Innenstadt  
Betriebsärztlicher Dienst  
Pettenkoferstr. 10  
80336 München  
Telefon 089/4400-53904 oder -53907  
Email: [Baedkum.Hospitanten-INS@med.uni-muenchen.de](mailto:Baedkum.Hospitanten-INS@med.uni-muenchen.de)

Regardless of the evidence required, additional vaccinations may be useful for personal protection due to the risks of infection posed by professional activities, e.g., hepatitis A and polio vaccination when in contact with patient excretions and hepatitis B vaccination when handling human tissue, blood or blood components.

Yours sincerely

Abteilung Personal

## Medical certificate for students/trainees working at the LMU Klinikum

This form has to be completely filled in and signed by the trainee's attending physician and sent to the occupational health service at least two weeks before start of internship.

Assignment as: \_\_\_\_\_

Department: \_\_\_\_\_

This is to certify that \_\_\_\_\_, born on \_\_\_\_\_ is physically and mentally healthy and does not suffer from infectious diseases. There are no medical concerns regarding the intended internship.

**Immunities concerning Measles, Chicken pox and Whooping cough, Covid19 are compulsory for every trainee. Exception "career day without active participation":**

### Measles

- ☐ trainee obtained at least two vaccinations or  
☐ positive serologic testing for measles immunity

### Chicken pox

- ☐ confirmed chicken pox disease in trainee's medical history or  
☐ trainee obtained at least two vaccinations or  
☐ positive serologic testing for chicken pox immunity

### Whooping cough

- ☐ trainee obtained a vaccination \_\_\_\_\_ (date) (within the last 10 years) or  
☐ documented disease by laboratory testing on \_\_\_\_\_ (date) (within last 10 years)

### Coronavirus:

- ☐ 1. vaccination: date \_\_\_\_\_ name of vaccine \_\_\_\_\_  
☐ 2. vaccination: date \_\_\_\_\_ name of vaccine \_\_\_\_\_  
☐ 3. vaccination: date \_\_\_\_\_ name of vaccine \_\_\_\_\_  
☐ positive PCR-Testing: date: \_\_\_\_\_

### Hepatitis B and C: If nursing/medical/dental/assistance tasks will be performed on patients, confirm additionally:

- ☐ infectious hepatitis B is currently ruled out (basic hepatitis B immunization + antiHBs >100 or HBs-AG neg. within last 3 months)  
☐ infectious hepatitis C is currently ruled out (antiHCV neg. within last 3 months)

### HIV: If invasive/surgical tasks will be performed on patients, confirm additionally:

- ☐ HIV infection is currently ruled out (results originating within last 3 months)

### Hepatitis A: If preparation of food/cooking tasks in canteens or shared kitchens will be performed, confirm additionally:

- ☐ trainee obtained at least two vaccinations or  
☐ positive serologic testing of immunisation

**By my signature, I confirm the accuracy of the statements above**

\_\_\_\_\_  
place / date / signature

readable seal with physicians name

Notice: Incomplete data or missing vaccination / immunisation can cause a delay or even cancellation of the internship – Please ensure that the trainee has all required vaccinations. Certain vaccinations might be covered by the health insurance. This certificate is necessary to ensure the safety of our patients. Moreover additional vaccinations may be indicated in the interest of the trainee.
